How would you give away £1m?
Very closed data...
A big challenge...

- £3.6bn = given annually by top 300 charitable grantmakers
- £15.6bn = government funds for charities
  £2.8bn in the form of grants
- 165,000 = registered charities in the UK
- 28,000 = voluntary organisations that make grants
There is diverse demand...

Government
People are using the data

- Helping grant seekers find funding
- Helping funders connect their work
- Helping researchers to understand trends
Who we are...
Learning from others...
A clear path…

**Pledge**
- The organisation is engaging with 360Giving and has expressed a commitment to publish its grants data.

**Prepare**
- The organisation is actively researching and processing data with a view to publication.

**Publish**
- The organisation has successfully opened data on its grants, using the 360Giving Standard.

**Progress**
- The organisation is regularly updating and using 360 data for its own purposes as well as encouraging others to use it through collaborative projects.
The standard: building blocks

- Organisation
- Document
- Currency
- Location
- Classification
- Grant Programme
- Event
- Transaction

360Giving
360Giving Data Standard Schema

id  string  The unique identifier for this grant. Made up of your 360Giving prefix, and an identifier from your records. See the 360Giving Grant identifier guidance for details.

title  string  A title for this grant activity. This should be under 140 characters long.
description  string  A short description of this grant activity.
currency  Currency  
amountAppliedFor  number  Total amount applied for in numbers (do not include commas or currency symbols such as £). If you have provided detailed transaction information on a separate table, this should equal the sum of all the application transactions for this grant.
amountAwarded  number  Total amount awarded in numbers (do not include commas or currency symbols such as £). If you have provided detailed transaction information on a separate table, this should equal the sum of all the award transactions for this grant.
amountDisbursed  number  Total amount disbursed (paid) to this grantee when this record was last updated (in numbers: do not include commas or currency symbols such as £). If you have provided detailed transaction information on a separate table, this should equal the sum of all the disbursement transactions for this grant.
awardDate  date-time  When was the decision to award this grant made. Dates should be in YYYY-MM-DD format.
url  uri  A URL (Web Address) where further information about this grant can be found. This could point to the website of the recipient organisation, or might link to further details on the funders website.
plannedDates  array  Event  When the applicant / implementing organisation originally intend this activity to take place.
actualDates  array  Event  When did this grant activity actually take place. Dates should be in YYYY-MM-DD format. A date range can include a start date and duration in months, or a start and end date.
recipientOrganization  array[1..]  Organization  Details of the recipient of this grant.
beneficiaryLocation  array  Location  Information about the location of beneficiaries. Further information about beneficiaries can be provided through classifications.
fundingOrganization  array[1..]  Organization  Details of the funder.
grantProgramme  array  GrantProgramme  -
fromOpenCall  enum  string  Yes No  Was this grant made as the result of an open call for applications? Values should be ‘Yes’ or ‘No’
fundingType  array  Classification  -
classifications  array  Classification  -
relatedDocument  array  Documents  -
applicationTransaction  array  Transaction  -
commitmentTransaction  array  Transaction  -
disbursementTransaction  array  Transaction  -
relatedActivity  array  string  The identifiers of any related activities (e.g. other grants given as part of a multi-grant project)

DATA REGISTRY

Dozens of organisations are publishing grants data to the open data standard developed by 360Giving.

This means they are sharing information about their grantmaking in a way which allows others to use it easily and for free. You can use the table below to download datasets from these organisations. You will see that each dataset has its own license attached to it. These licenses specify how the data can be shared and used. The data in these spreadsheets is used and displayed by a growing number of tools and websites. If you are looking for examples of what can be created using this data, please visit the Resources page.

Developers: For a JSON feed of published datasets visit http://data.threesixtygiving.org

Using our templates you can publish data directly on your own website: keeping you in control. By registering your data with 360Giving, it becomes easier for others to find, analyse and re-use. If you would like to find out about the free support we can provide to help you publish your grants data, please contact us.

New Questions are Good

1. Common measurements and metrics
2. Reliability of data entry
3. Interpretation and context
4. Privacy and appropriateness of ‘open’
5. Reputational concerns
6. Practicalities of resource and skills
7. Unexpected consequences…
