Note: username and password are case sensitive.

Please see the navigation provided on the Test Perspective toolbar. Your account includes a ready-to-use test site and some pre-recorded scripts. The web site also provides a description of the features they demonstrate. You can download the sample scripts from the online help and view them with the Test Perspective Recorder.

Keynote Test Perspective is a cost-effective, completely self-service Web site load testing tool. With Test Perspective, you can run the most realistic load tests on-demand and receive immediate feedback on modifications you make to your Web sites.

Working Examples & Practice Server

The Keynote Difference

Dedicated systems on the Keynote Global Network deliver consistent and repeatable load conditions. Keynote never rents capacity on shared infrastructures or relies upon unstable end-user populations.
