Bug Description

http://docs.openstack.org/trunk/openstack-compute/install/apt/content/externals.html#d6e470

The Diagram still shows as nova-volume it should be Cinder now. It will be great if we can also add a scenario with Quantum in picture. As of now it only talks about nova-network.
Contribution level

- Level 0: Answering a question
- Level 1: Implementing a patch
- Level 2: Contributing blueprints
- Level 3: Modifying the architecture

Genevieve: hi adolpho

Meeting name set to 'xga_2'

Genevieve: Been a long time! How have you been? :)

* arbrandes digs up our last meeting

Meeting name set to 'xga_2'

Genevieve: good, i've been a bit busy :-(

Genevieve: That's good! Better than bored, hahahah

Genevieve: yes...

Genevieve: i've succeeded in installing my dual boot engine, and i've progressed

Genevieve: Ok, so let's try to find where we left off.

Genevieve: This was the bug, right?

Genevieve: #link https://bugs.launchpad.net/swift/+bug/1037340

Genevieve: correct

Genevieve: We spent some time last session trying to submit an OGI and also setting up git review.

Genevieve: i've installed git review

Genevieve: What do you mean by dual boot engine? Booting Linux?

Genevieve: yes

Genevieve: Ah, that's great!

Genevieve: Did you manage it?

Genevieve: and i've just finished downloading maven packages
General setup

[*] Enable loadable module support
[*] Enable the block layer
  - Processor type and features
  - Power management options
  - Bus options (PCI etc.)
  - Executable file formats / Emulations
  - Networking
  - Device Drivers
  - Firmware Drivers
