Core competencies

O’Reilly online learning is a solution that helps nearly every government organization and employee prepare for what’s coming next in the era of constant change and IT transformation. Our experts track the faint signals of emerging technology trends to pinpoint the knowledge your agency needs to remain aligned with change. O’Reilly online learning provides continuous training in these areas and allows individuals to build skills in leading technologies like cloud computing, software architecture, cybersecurity, artificial intelligence, and data science to solve problems and close knowledge gaps to reach imperative career and business goals.

Differentiators

Best-in-class training in leading-edge technologies with:

- Content across a range of subjects from 200+ of the world’s best publishers.
- Live online training courses on leading technology topics led by industry experts and instructors from our network of tech innovators.
- O’Reilly’s network of experts, who track essential topics and big ideas to deliver insights on the impact they’ll have on your agency and missions—so your team can proactively prepare for what’s next.
- A certifications experience that helps your team prepare for the most sought-after certifications in tech, with direct paths to the official materials plus practice exams.
- Interactive scenarios and sandboxes where teams can explore new technologies in a real dev environment—right in their browser. So they’re properly prepared when it’s time to face real-world situations that can affect your agency.
